

WashBoss 9 Mask Professional Washing Machine

The WashBoss 9 Mask washing machine is designed for cleaning full-face masks and other small units. It features a compact, stainless steel design, simple controls, low water and energy consumption, and easy maintenance. The unit is also insulated to reduce heat loss and minimize noise emissions. Ideal for professional settings, it ensures safe and efficient cleaning.

Benefits

Specialized for breathing masks

The WashBoss 9 Mask washing machine is specifically engineered for the safe cleaning and disinfecting of full-face masks and other smaller devices. It uses a mildly alkaline, phosphate, and chlorine-free cleanser, followed by a citric acid-based optional neutralizing agent, ensuring thorough and safe cleaning.

Compact and efficient design

The WashBoss 9 Mask washing machine is compactly built to occupy minimal space while providing maximum efficiency. Its stainless steel construction is insulated against heat loss and noise emission, making it a durable and quiet addition to any professional setting.

User-friendly operation

The machine features simple controls with three push-buttons for different wash times (5, 10, or 21 minutes). The digital display shows the temperature for both the tank and the boiler, making it easy to monitor and adjust settings as needed.

Low water and energy consumption

The WashBoss 9 Mask washing machine is designed to be environmentally friendly, with low water and energy consumption. It reuses warm water from each rinse cycle and only uses clean water for the final rinse, achieving a water consumption of just 2 gallons per cycle.

Easy maintenance and cleaning

The WashBoss 9 Mask washing machine is easy to maintain, with removable spray arms and sieves that allow for thorough cleaning of the machine's interior. Its stainless steel construction ensures a hygienic operation and long-lasting and effortless durability.

High-quality and reliable performance

The WashBoss 9 Mask washing machine is built to provide reliable performance with minimal maintenance. It features a temperature safety device, door switch, and clear signal lamps and LED displays to ensure safe and efficient operation. The machine's high-quality construction guarantees a long life cycle and consistent cleaning results.

Advantages compared to other washing machines:

- Specially engineered for full-face masks
- Fast cleansing cycles
- The masks do not need to be transferred to another basket for drying
- Lower consumption of both water and electrical energy
- Simple to operate
- Low noise level when in use
- Minimal maintenance on the machine
- Long lasting durability
- A high quality product with long-lasting durability
