TAGLOCK™ Circuit Breaker Securing Devices

Tagout plus physical restraint protection for multiple workers

With TAGLOCK™ circuit breaker securing devices from Brady, your maintenance team members can individually tag and secure each circuit breaker for improved safety and compliance. These devices are secured to circuit breakers with standard non-releasable 50-pound minimum strength nylon cable ties and meet OSHA requirement 1910.269(d)(3)(ii)(D) for power generation, transmission and distribution facilities.

TAGLOCK securing devices feature:

- **Easy installation** onto the breaker with nylon cable tie and the worker's ID tag
- **Multiple worker tagging capabilities** for up to 4 workers to apply a nylon cable tie and their ID tag
- **Secure restraints** that will remain securely fastened to the breaker switch until each person has removed their nylon cable tie and tag
- **Pre-loadable tags** enable users to prepare ID tags in advance and then quickly secure them to the designated energy control lockout points
- **More convenient** lockout tagout option eliminates the need to use locks
- **Cost savings** from less tag preparation and reduced equipment downtime

Securable by BOTH cable tie and safety lock at the same time

Save time by "pre-loading" your tag and cable tie before walking to the energy point

120V breaker lockout devices fit on breakers next to each other, enabling multiple tagouts at one time
