

The following hoses are conventional woven jacket fire hoses with synthetic liners. Prices shown are for bulk hose without fittings. For couplings and accessories, see Green Line Fitting Catalog.

Note: Other Green Line discharge hoses are often used in the place of jacketed fire hoses for such applications as washdown and stand-by forest fire protection. Please see G972 and G1373 in the Water Hose section.

G1921... SINGLE-JACKET INDUSTRIAL & FORESTRY

A top quality, all synthetic, rubber lined hose for indoor and outdoor use.

Tube: Black rubber.

Cover: White 100% synthetic fabric.

G1942... DOUBLE-JACKET INDUSTRIAL

Double-Jacket Industrial is a heavy-duty, all-synthetic hose with a rubber lining for higher pressures and severe applications.

Tube: Black rubber.

Cover: White 100% synthetic fabric.

G1921GHT... GARDEN HOSE THREADED ASEMBLIES

Small hoses are typically used with backpack and small portable pumps to clean up spot fires. These 5/8" and 3/4" hoses are rated to 200 psi working pressure with a 600 psi burst

Hose size	Thread type	Length	Part Number	Weight Each	PRICE EACH
Garden Hose Thread					
5/8"	Garden Hose Thread	50 ft	G1921-063GHT50	1.0 lb	\$ 78.50
3/4"	Garden Hose Thread	50	G1921-075GHT50	1.5	94.30

In 1 1/2" most hoses are supplied in Canada with forestry instantaneous or NPSH parallel pipe threads. (in the USA and on international ships, the 1 1/2" thread will be NST – also known as NH or ANSI).

CAUTION: Single jacket fire hoses have no external cover to protect the reinforcement, and so will fail prematurely when dragged repeatedly. For washdown service, a better choice is double jacket hose, so the second jacket serves as a guard to protect the inner layer. Where hose is used regularly, G1373 Black Dragon hose provides the best overall value.

FIRE HOSE

Please be sure to check that threaded fittings are compatible with the hydrant or standpipe to which the hose will be coupled. Municipalities and fire departments in different regions choose from a variety of available threads. For 2½", threads can vary by region. When you order 2½" assemblies, specify the thread required from the list shown.

HOW TO MEASURE A MALE FIRE HOSE THREAD

Take a strip of paper about 1" wide and wrap it around the male thread snugly so that it overlaps. Where the two ends overlap, use a pin to pierce the paper so that there is a hole in both ends. Press your thumb against the paper so that the threads leave an impression. Remove the paper and measure the distance between the pinholes. This distance, divided by 3.1416, equals the thread o.d. Count the number of thread impressions showing on the paper and divide by the total width of the impressions (in inches). This figure is the pitch in threads per inch.

Wherever fire hose is used as a municipal water main by-pass during water main repairs, a potable water quality hose should be used. G1942BP is often used in conjunction with our G1031-075 by-pass hose to connect municipal water customers during water main replacement. Potable water hoses should also be specified for water tanker fill and delivery lines.

G1942BP... DOUBLE-JACKET POTABLE WATER HOSE

Tube: Food grade polyurethane. Finished product meets MIL-H-24606B standards for potable water use.

Cover: Two layers of polyester yarn with blue polymer impregnation for increased abrasion resistance.
